

Therapies for More Tomorrows.

Expanding oncology access.
Preserving the connection between
the patient and the treating practice.

ACCESS. CONTINUITY. VISIBILITY.

**When the MIP cannot dispense,
the care connection continues.**

THE PRINCIPLE BEHIND OUR MODEL

Extend access. Keep the MIP at the center.

SortPak serves as an extension of Medically Integrated Pharmacy (MIP), aligned with the oncology center's care model.

OUR MISSION

Expand access to oncology therapies through partnerships that support the MIP model and preserve the patient's connection to the treating team.

OUR VISION

A connected oncology ecosystem where access barriers can be addressed while the oncology center retains treatment oversight.

When product access is limited

Manufacturer authorization creates an additional pathway for eligible patients whose MIP lacks access.

When payer rules restrict dispensing

Coordinate eligible options when coverage or network requirements limit the MIP's ability to fill.

When reimbursement is a barrier

Support an outside dispensing pathway while keeping the referring practice involved.

NATIONAL RELATIONSHIPS. PATIENT-LEVEL COORDINATION.

National relationships. Individual access pathways.

Our relationships with health plans, MSOs, and IPAs support coordination across Medicaid, commercial, and Medicare populations. Each patient's pathway is reviewed against their coverage, prescribed therapy, and access requirements.

Medicaid

Navigate state- and plan-specific coverage, managed-care requirements, and prior authorization needs.

Commercial

Coordinate plan and network requirements, prior authorizations, and eligible copayment assistance options.

Medicare

Review plan-specific coverage, authorization requirements, and available assistance pathways.

One patient commitment. A pathway tailored to the benefit.

Dispensing and assistance eligibility are confirmed for each patient. Program rules, payer networks, state requirements, and product authorization apply. Website dashboard imagery is illustrative.

FROM REFERRAL THROUGH ONGOING THERAPY

Dedicated to the patient. At every stage of therapy.

After product authorization, our team works with the MIP and patient to confirm eligibility, navigate access requirements, coordinate dispensing and delivery, and remain engaged with refills and medication questions.

01

Prior authorization

Coordinate required information with the oncology office, track authorization progress, and communicate the next step.

02

Copayment assistance

Review available copay programs and help eligible patients navigate enrollment and program requirements.

03

Patient assistance programs

Evaluate available patient assistance pathways and support the application process, subject to program eligibility.

04

Pharmacist-led support

Provide medication review, interaction screening, patient education, and communication with the prescribing team.

05

Delivery coordination

Confirm arrangements with the patient and keep the oncology office informed about order and delivery progress.

06

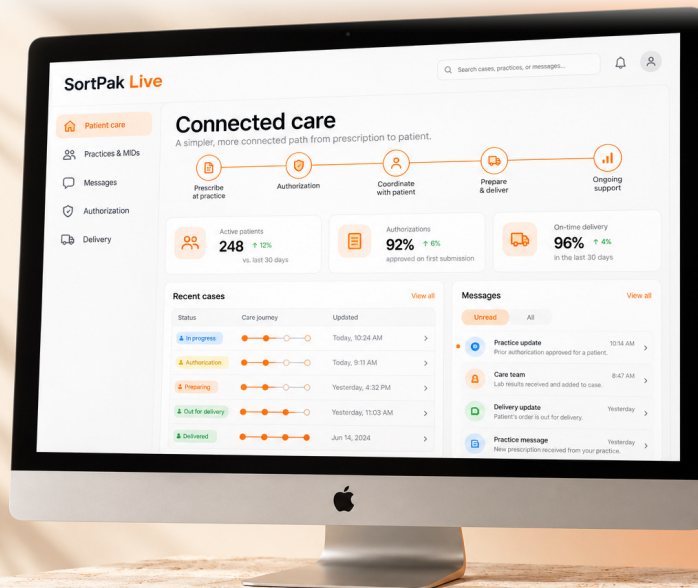

Ongoing follow-through

Coordinate refill needs, respond to medication questions, and maintain communication with the referring MIP.

THE CONNECTION THROUGHOUT THE JOURNEY

SortPak Live. The patient journey, connected.

Make the next step visible: shared case information and direct communication keep the MIP involved beyond the referral.

FOR THE MIP & TREATING PRACTICE

Stay connected to each referred patient.

Prior authorization status and case notes.
Order progress and delivery information.
Direct messaging with the SortPak team.
Coordination of the next step.

FOR MANUFACTURER PARTNERS

Follow the access milestones.

Agree on access and dispensing milestones, therapy-specific
REMS checkpoints, follow-up reporting, and reporting cadence.

Illustrative portal view. Practice access is scoped to its patients and authorized team. Manufacturer visibility depends on program agreements, patient permissions, and applicable privacy requirements.

MIP ACCESS CONTINUITY PROGRAM

Why Give SortPak Access?

Help your therapy reach eligible patients.
Keep their oncology team connected.

FOR MANUFACTURERS

An additional pathway. A measurable purpose.

Reach eligible referrals when product access, payer restrictions, or reimbursement barriers prevent the MIP from dispensing. SortPak evaluates eligibility and coordinates access, dispensing, and ongoing support.

Together, define reporting for referral reasons, access resolution, time to dispensing, and practice updates.

FOR THE MIP

Keep the practice involved.

The oncology team directs treatment. SortPak Live connects case notes, authorization and delivery updates, and direct communication.

FOR THE PATIENT

Support at every step.

Benefits review, authorization support, eligible financial assistance, pharmacist education, delivery, and refill coordination.

SortPak Live: a continuous connection to the treating practice.

Illustrative portal view; figures are sample data. Product, payer, licensure, and eligibility requirements apply.

PROVEN LAUNCH EXPERIENCE. A CONNECTED CARE MODEL.

Experience with complexity. Commitment to the patient.

Successfully supported multiple limited-distribution medication launches, including therapies with REMS requirements.
Independent oncology focus. Well over 20 years of team expertise.
